

Title: Centrica – Electricity Distribution Price Control Review

Date: April 2009 – Ongoing

Client: Centrica

Country / Region: United Kingdom

CEPA has been engaged by Centrica to provide advice during the recently commenced price control review by Ofgem of the electricity distribution companies in Great Britain.

CEPA will support Centrica's preparation of responses to Ofgem consultations and wider participation in the review. The precise areas on which CEPA will provide advice depends on the issues that arise, but amongst other things it is likely to include financial issues and the determination of cost of capital, and price control structure and incentives.
